

M. VIGHNESH PRASAD

Computer Science Undergraduate
Kurnool, Andhra Pradesh | +91 8309877916 | vighneshprasad12@gmail.com
LinkedIn | GitHub | Portfolio | LeetCode

SUMMARY

Computer Science undergraduate with internship experience shipping production web applications, AI pipelines, and backend services for real clients. Proficient in React, Next.js, Node.js, Python, SQL, and distributed system design.

TECHNICAL SKILLS

Languages: C++, Python, JavaScript (ES6+), TypeScript, SQL
Frontend: React.js, Next.js, Redux Toolkit, Tailwind CSS
Backend & APIs: Node.js, Express.js, REST APIs, Authentication & Authorization
Databases: PostgreSQL, MongoDB, MySQL
Tools: Redis, Docker, Linux, Git
Core Concepts: Data Structures, Algorithms, Operating Systems, Machine Learning, OOP

INTERNSHIP EXPERIENCE

Software Engineering Intern *Viksit Consulting | May 2026 – July 2026*

- One of two engineers at the firm; sole owner of four client-facing tools from scoping through deployment with minimal oversight.
- Architected a multi-stage bank statement classifier for scanned images, PDFs, and Excel files—using regex pattern matching and merchant-memory feedback, with an LLM fallback reserved for low-confidence cases, cutting manual review time.
- Built the backend for a role-based business health analysis platform (Super Admin, BDR, Client) that auto-generates PDF reports after a one-time assessment; live and serving real clients.
- Engineered an ITR forecasting tool applying ARIMA and time-series modeling to historical financial data, producing quarterly tax-liability projections.
- Launched a promotional landing page with CSS animations and a multi-section layout, now the firm’s primary outward-facing site.

PROJECTS

Studify (Multimodal RAG Chatbot) *GitHub*

- Raised answer relevance to 88.64% cosine-similarity on a standard RAG benchmark by layering dense embeddings with cross-encoder reranking over a naive retrieval baseline.
- Halved end-to-end query latency from 2.5 s to 1.3 s by introducing smarter query routing and result caching across large document inputs.
- Ingests PDFs, images, and plain text through a unified preprocessing pipeline, enabling multimodal inference from a single entry point.

CodeBuddy (Competitive Coding Platform) *GitHub*

- Hosts 50+ curated problems with Judge0 evaluation across 5+ languages, running each solution in an isolated container per submission.
- Adopted a stateless request model with Redis-backed caching to process concurrent judge jobs without cross-request interference.
- Wired retry logic for conducting contest for over 10000 people at the same time without any delays.

Online File Management System *GitHub*

- Implements hierarchical folder structures with CRUD, bulk actions, and a Recycle Bin engineered for safe concurrent access.
- Embeds an in-browser code runner covering 5+ languages with per-session resource caps to prevent runaway processes.
- 10+ Features including token file sharing, per-user analytics dashboards, and a Gemini summarizer for instant document overviews.

EDUCATION

IIITDM Kurnool *Kurnool, Andhra Pradesh*
B.Tech in Computer Science and Engineering (2023–2027) *CGPA: 8.6 / 10*
Sri Chaitanya Junior College *India*
MPC *JEE Percentile: 97.6%*

ALGORITHMIC & COMPETITIVE PROGRAMMING

- GATE CSE 2026: All India Rank under 2400.
- LeetCode rating 1800+; solved 500+ problems across LeetCode and GeeksforGeeks.
- CodeChef 3-star; completed 20+ rated contests; placed 2nd in the Kurnool-wide Codeforces contest (IIITDM Kurnool).

CERTIFICATIONS

- NPTEL Cloud Computing | Spoken Tutorial (C, Python, Linux) | Accenture Job Simulation.
